Weekly Report

Directorate of Administration

- The George Hyman Construction Company has poured the last caisson for the foundation of the new building during the past week. Final grading of the site is taking place and, in the near future, construction activity will move to the upper areas to remove the asphalt from in front of the Printing and Photography Division Building and make backfills in the powerhouse area.
- The environmental assessment for the road improvements for Route 123 has been received by the New Building Project Office and plans are being made to have a CIA Traffic Advisory Committee meeting during the week of 18 March.

DDA 85-0061/9  
8 March 1985

MEMORANDUM FOR: Director of Central Intelligence

FROM: Harry E. Fitzwater  
Deputy Director for Administration

SUBJECT: Weekly Report for Period Ending 8 March 1985

25X1

1. Progress reports on tasks assigned by the DCI/DDCI:

None.

2. Items/events of interest:

a. The 28 February PanAm strike required extra efforts by the Central Processing Branch/OP (CPB/OP) to ensure Agency travelers could depart as scheduled. All travelers scheduled for PanAm flights had to be changed to other available American carriers, and an early morning start by CPB allowed many changes to be made before available seats on the other carriers were taken by commercial and other government travel offices. As a result of this effort, CPB has not yet had to utilize foreign carriers for transoceanic flights.

b. During the reporting period, a former Social Security Administration employee entered on duty with our Retirement Division/OP. We have been attempting to recruit such an individual for some time to help us develop a better ability to handle Social Security claim problems created by Agency employment.

d. On 1 March, the D/OS and the Chief, Technical Security Division/OS briefed the International Nuclear Forces (INF) team at the Department of State. The INF team will be involved in the Geneva Arms Reduction Talks scheduled to begin in Geneva, Switzerland, on 12 March. 25X1

S E C R E T

S E C R E T

[REDACTED]

f. On 6 March, [REDACTED] Security Protective Officers departed for an eight week training course at the Federal Law Enforcement Training Center, Glynco, Georgia. This is the third consecutive group of Agency Security Protective Officers to be enrolled in this basic course for instruction of law enforcement and police techniques.

[REDACTED]

i. Representatives from the Office of Training and Education briefed managers in the Office of SIGINT Operations, Foreign Broadcast Information Service, and National Photographic Interpretation Center last week on courses being developed as part of the DS&T training program. These briefings, 25X1 conducted at the request of the DDS&T, are designed to introduce mid- and senior-level managers to courses being designed specifically for their personnel. These briefings will culminate in the development of a catalog and a schedule of courses specifically designed for DS&T personnel. The catalog will be used by DS&T managers in selecting appropriate training and career development opportunities for their employees.

[REDACTED]

k. The Agency Security Classification Officer accompanied a representative of the Information Security Oversight Office (ISOO) on the first of five scheduled FY 1985 ISOO inspections of the Agency's information security program. An initial inspection was made of the Office of Research and Development, DS&T, as well as a follow-up inspection of the Intelligence

S E C R E T

S E C R E T

Community Staff (ICS). No major problems were encountered in either office; however, the inspection did reveal minor inconsistencies in some classification markings. The next inspection is scheduled for April and will include the Office of Scientific and Weapons Research and the Office of the Comptroller.

1. The George Hyman Construction Company has poured the last caisson for the foundation of the new building during this past week. Final grading of the site is taking place and, in the near future, construction activity will move to the upper areas to remove the asphalt from in front of the Printing and Photography Division Building, Office of Logistics, and make backfills in the powerhouse area. 25X1

o. The environmental assessment for the road improvements for Route 123 has been received by the New Building Project Office (NBPO) and plans are being made to have a CIA Traffic Advisory Committee (TAC) meeting during the week of 18 March. In recent conversations with the Virginia Department of Highways and Transportation, it appears that they are prepared to support Alternative 2, which is the plan agreed upon by the Community. However, a position from Fairfax County has not yet been determined. Ms. Nancy Bennett, Congressman Wolfe's aide, has informed NBPO that the Congressman would appreciate it if NBPO representatives would meet with Fairfax County officials and secure their support for Alternative 2. Mr. S.K. Pant from the Fairfax County Office of Transportation has been contacted and NBPO will hand carry a copy of the assessment to him and let him know the position of the other TAC members. Every effort will be made to convince him to secure support from the County for Alternative 2.
